Continue

After all the check steps have been completed, you will be directed to the page above. Please click on the full-screen button.

# Let's finish setting up your PC

Your PC needs to be backed up and connected to a few more Microsoft services to help you work more easily and securely across all your devices.

## Back up your files with OneDrive cloud storage

Have peace of mind knowing they're backed up and available across your devices.

## Enhance your web browsing experience

Restore Microsoft recommended browser settings.

## Achieve more with a Microsoft 365 subscription

Get premium Microsoft 365 apps, 1 TB of cloud storage to back up files and photos, and more.

## Back up your phone to your PC

Access your phone's photos, texts, and more, right on your PC.

## Sign in quickly with Windows Hello

Securely unlock your device with a touch or a smile.

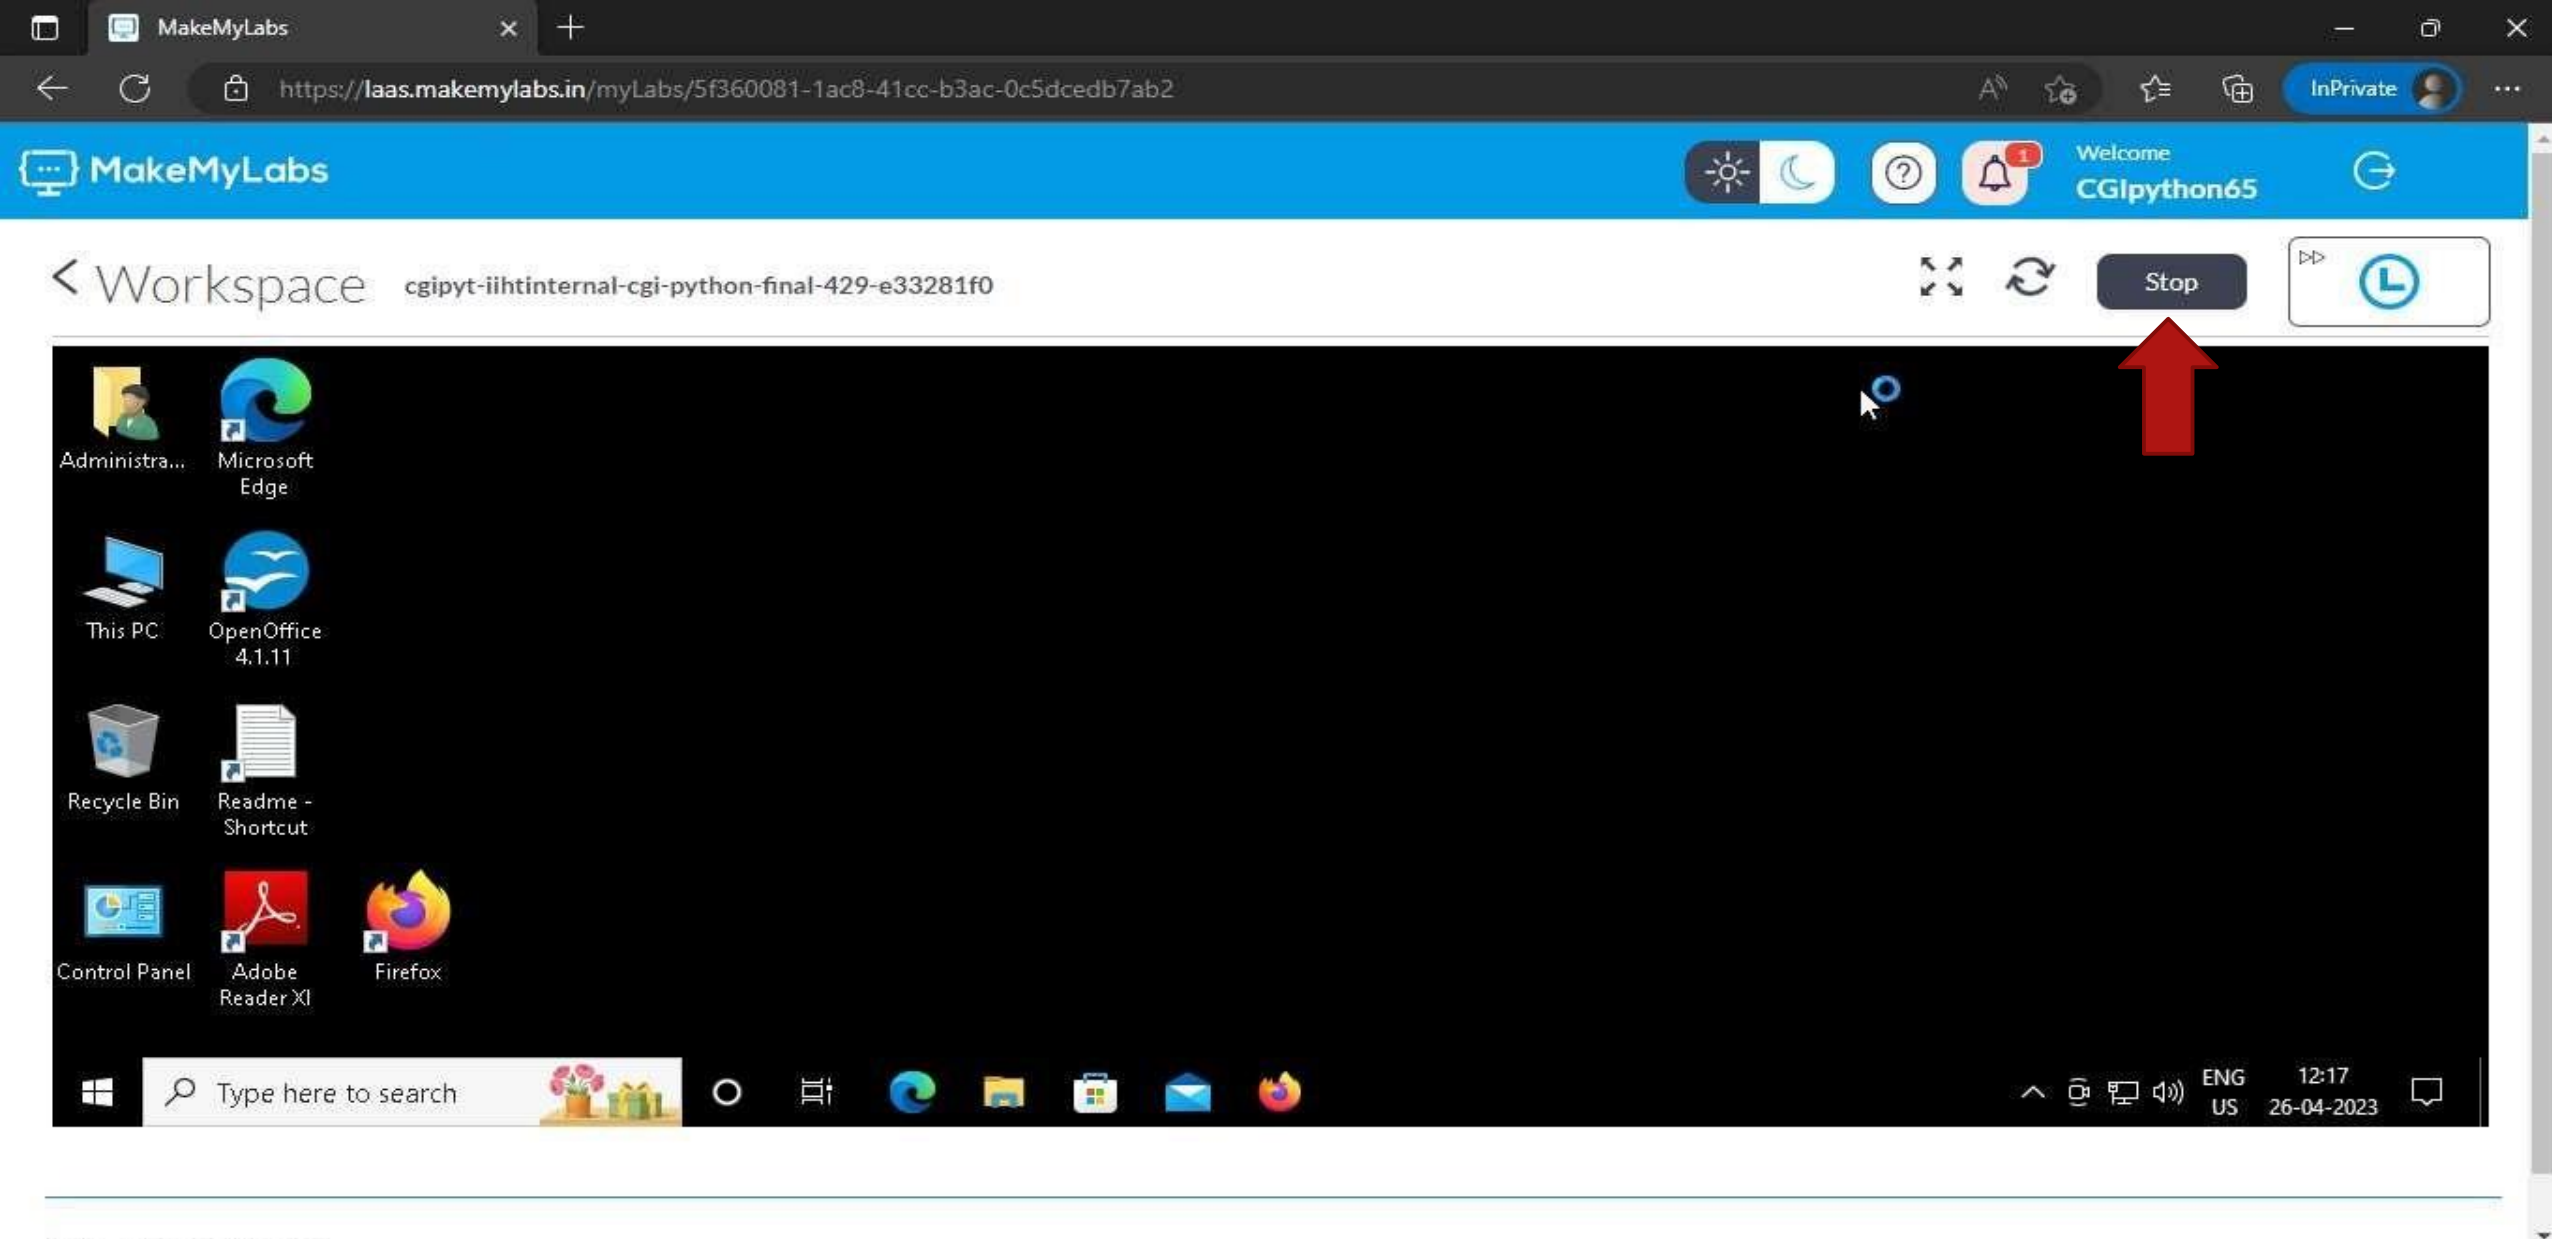

Remind me later

Continue

Click on 'Remind me later'. To exit full-screen mode, press the 'Esc' key

Click on the Stop button to shutdown the VM.

If your VM is Stop or Suspended Then Click On 3 Dots and Power On.

# Dos and Don'ts'

- Do not leave the virtual machine (VM) idle for more than 10 to 20 minutes, or it will enter into suspended state.
- Refresh the page to check the current VM power state. If it shows that the VM is in suspending or Shutdown in Progress , wait for a while until the VM is suspended or Shutdown.
- The provisioned VMs will be automatically deleted after the validity or hours allocated which ever expires earlier.

Kindly request 3-4 working days priorly for any extensions before the expiry date.

- For any support, please send an email to the following mail IDs: [itsupport@iiht.com](mailto:itsupport@iiht.com), [labsupport@iiht.com](mailto:labsupport@iiht.com).

Thankyou
